

HARBEC Recognized by U.S. EPA as a Green Power Leader

September 22, 2016
Ontario, NY

HARBEC, Inc. (www.harbec.com) proudly announces that it has received a Green Power Leadership Award from the U.S. Environmental Protection Agency (EPA).

HARBEC received official notification from the U.S. EPA that it will be recognized as a member of its 2016 Green Power Leadership Club, an elite group of Green Power Partners that demonstrate exemplary green power procurement and environmental leadership. Since 2004, HARBEC has been an EPA Green Power Partner. In addition, HARBEC received a Green Power Leadership Award for On-Site Generation in 2004.

HARBEC's President and Founder, Bob Bechtold, states, *"Our induction into the EPA's Green Power Leadership Club is a tremendous honor. For the past 15-years we have been on a deliberate journey to reduce our carbon emissions by producing and/or purchasing green power. We are grateful to have partners like the EPA to help us magnify the economic and environmental benefits of green and sustainable energy solutions for manufacturers."*

About HARBEC

Founded by Bob Bechtold in 1977, HARBEC's mission is to provide tightly toleranced prototypes, tooling, machined components and quality injection molded parts in a sustainable manner with a social conscience. They provide superior customer service, satisfaction and timely delivery of custom engineered solutions. HARBEC proudly foster an atmosphere of encouragement and respect for the health and prosperity of their customers, employees, and the global community.

HARBEC provides capabilities and solutions for the consumer product, sporting goods, defense/aerospace, transportation, medical, marine, and energy industries. HARBEC has capabilities in the use of innovative materials, problem-solving, and working with R&D and commercial organizations on unique prototypes, or engineering and manufacturing groups on high volume production. HARBEC has capabilities for short (1-to-100 parts) or longer run (>1M parts) production.

HARBEC is certified as an ITAR, ISO9000-2008, ISO14001, and ISO50001/SEP Company, demonstrating its use of "eco-economic" decisions and policies designed to ensure that its activities are sustainable. HARBEC has developed and implemented a myriad of solutions to offset emissions, utilize waste and conserve resources. HARBEC reached its goal of "no carbon footprint" in 2013. Currently, the facility has a 250kW and 850kW wind turbines and operates a combined heat and power plant which generates electricity and provides thermal energy to meet the heating and cooling requirements of the facility.
