Broomall, PA 19008-4293

Dear Friends at Drummond Scientific Company,

Since 2013, HARBEC has been a Carbon Neutral company. HARBEC cares deeply about the environment and it's reflected in everything we do. During an average year we combine energy efficient equipment with on-site green energy generation for 60%, and purchase Green utility power for another 20% of our total energy needs. The remaining 20% represents natural gas and vehicle fuel which we offset by purchasing carbon credits. By doing this we reduce our greenhouse gas (GHG) emissions to zero, eliminate our carbon footprint and so lower our environmental impact and consumption of natural resources such as water, land, air and non-renewable fossil fuels. As a customer of HARBEC, you are contributing to Carbon Neutral manufacturing and the future of our planet.

HARBEC believes in the "Triple Bottom Line", People, Planet, and Profit, all with equal priority. Together we can lower the CO2 emissions we are responsible for by doing things like driving less, recycling, using renewable energy, and buying energy efficient products and equipment. Because Carbon Neutrality was such a significant goal to pursue, HARBEC chose to adopt the energy management standard ISO 50001, and the U.S. Department of Energy's Superior Energy Performance (SEP) process to ensure that a procedure and verifiable method for measuring, monitoring, and calculating energy use, efficiency, and savings is done consistently over time. As a result of ISO 50001/SEP, HARBEC has been able to account for its energy utilization and dramatically improve its energy performance.

Below you will find your **quarterly** statement for the amount of Carbon you have saved by choosing HARBEC as your valued supplier. We calculate this number by adding up the machine minutes total used to make your parts and multiplying them by the average amount of carbon per kWh presented by the EPA annually.

<https://www.epa.gov/energy/greenhouse-gases-equivalencies-calculator-calculations-and-references>

**7,045** lbs of Carbon Savings this **Quarter** 01/01/2021 - 03/31/2021.

We thank you for your support of sustainable, carbon free manufacturing and look forward to a continued partnership.

Sincerely,

*Bob Bechtold*
